## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 13-14, 23 and 51-60, drawn to low pass non-adaptive and non-variable filtering, classified in class 382, subclass 264.
  - II. Claims 1-12, 15-22 and 24-50, drawn to adaptive or variable filtering, classified in class 382; subclass 261.

The inventions are distinct, each from the other because of the following reasons:

- (1) Regarding invention I: where claims are drawn to class 382/264 regarding low pass non-adaptive and non-variable filtering.
- (2) Regarding invention II: where the claims are drawn to class 382/261 regarding filters that are focus toward adaptive or variable filtering.

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. This application contains claims directed to the following patentably distinct species of claimed Invention II:

Art Unit: 2609

- Species 1 based on sieve filtering technique in modifying the image (Examiner suggesting to include claims 1, 5-12, 15-20, 22, 24-29 and 30-33, if Species 1 being elected),

-Species 2 base on spatially processing in modifying the image (Examiner suggesting to include claims 1, 3-12, 15-22, 34-39, and 40, if Species 2 is being elected),

-Species 3 base on dithering technique in modifying the image (Examiner suggesting to include claims 1, 15-20, 22 and 41-45, if Species 3 is being elected),

-Species 4 base on adaptive filtering to modify the image (Examiner suggesting to include claims 1, 15-20, 22 and 46-50, if Species 4 is being elected),

-Species 5 base on nonlinear filtering to modify the image (Examiner suggesting to include claims 1-2, 5-12, 15-20 and 22, if Species 5 is being elected).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 generic to claims 5-12, 15-20 and 22.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

Art Unit: 2609

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
